#### **SUPPLEMENTAL RESTRICTION REQUIREMENT**

Upon further consideration, the following supplemental restriction requirement is made to the restriction requirement of 10-7-94.

Claims of Group I invention are generic to a plurality of disclosed patentably distinct species comprising those defined by the working examples or those species that are specifically recited as preferred embodiments of the invention. Applicant is required under 35 U.S.C. § 121 to elect a single disclosed species, even though this requirement is traversed.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. § 103 of the other invention.

The species election requirement set forth only pertains to Group I invention set forth in the previous office action.

Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to John D. Peabody III, Ph.D. whose telephone number is (703) 308-4690.
